AutomWorx Migration Services Datasheet

Our Consultants have over fifteen years of Automic software implementation experience

•

Maximize your Automic investment by understanding and leveraging more product capabilities – *especially with Automic Workload*

•

We develop custom solutions including proprietary migration utilities

•

AutomWorx is a software reseller and offers licenses, maintenance and Extended Support options

Snapshot – Who is AutomWorx?

• AutomWorx is an independent consulting company staffed with a team of highly experienced solution architects, consultants, and project managers with over fifteen years of experience working with Automic software for customers globally. We are here to assist you with all of your Automic needs – whether that involves new licensing, installation, upgrades, migrations, product training or Extended Support.

Snapshot – Migration Services for Automic Software and Platforms

• Depending on the version of Automic, AppWorx, or UC4 software that you may have in place, you may need to migrate your existing job configurations to a different Automic platform. Our senior consultants have written and successfully deployed the migration utilities needed to avoid business disruption.

• AutomWorx is not just focused on Automic to Automic migrations – we have also assisted Customers that are considering a switch to Automic platform from alternative job scheduling programs.

• In addition to Automic software migrations, our consultants are also highly proficient at helping you switch to new operating systems and/or database management platforms, including mainframe/zOS, Windows Server, Linux and UNIX distributions.

• AutomWorx offers end-to-end migration expertise:

   o In-depth architectural analysis, business requirements gathering, job configuration and report mapping

   o Technical and sizing consultation around the hardware, operating systems, database management systems & third-party utilities required to sustain your new Automic environments

   o New software installation in your non-production and production environments

   o **Proprietary, custom-written migration utilities to map your existing job configurations to your new Automic environments**

   o Establishing a Disaster Recovery plan and configuration with you

   o Testing and issue remediation

   o Go-live assistance

   o Project management oversight with a specialization in Automic migrations

Recap: Automic Migration Services

- AutomWorx will assist you with a successful migration from AppWorx to Automic Workload
- The Automic Workload application is Broadcom's go to market recommendation software and is heavily developed so that customers can take advantage of the latest technologies
- AutomWorx consultants have been migrating customers from AppWorx to Automic Workload for over seven years
- AutomWorx offers product installation, education, data migration and integration services as part of your Automic migration services offering
- Automic Workload is a true enterprise software product that introduces many features that do not exist in AppWorx. Just some of the features that Automic Workload offers include:
    - Active/active Automation Engine (master) Configuration as an HA Solution
    - Multiple Webserver with load balancing capability
    - Support for multiple databases (Oracle, MS SQL, PostgreSQL and DB2)
    - Support for the majority of OS Hardware offered in the market
    - Multi-client technology to help minimize the requirements of multiple non-production masters/environments
    - Analytics Reporting and Dashboards
    - OS Agent can run with lower Automic Software versions so there is no need to upgrade all your components at once
    - Zero Down-time Upgrade (ZDU)
    - Centralized Agent Upgrade (CAU) to help you schedule OS agent upgrades
    - Updated Rapid Automation Agents, including:
        - WebServices for both REST and SOAP calls
        - Oracle E-Business Suite, Oracle PeopleSoft, Oracle Hyperion, Oracle JD Edwards
        - Ellucian Banner
        - FTP, Informatica and others
    - API-enabled
